

# AUSTRALIA

Growing up in Australia is so much fun but in summer it is hot and in winter it's frezzzing.

Red, orange, purple and pink rainbows are so pretty I think they're the prettiest thing in the world.

Orang-utans are the most endangered species. Have you seen the ad about orang-utans they are so beautiful.

Wind is strong and it can nearly blow you away.

Insects, insects and more insect's tonnes, millions, billions and trillions.

Nans, pops, aunties, relatives I'm sure everyone has at least one of them.

Green, green grass is so nice I reckon everyone should have at least a square of it.

Up, up in the sky it is so nice you can see everything from up there.

Pets, pets can be so cute when they're little until they're bigger.

Indoors is boring but you can play board games inside but is still so boring.

Names, names I think everyone should have a name because if they didn't have a name we wouldn't know who was who.

Australia is where most people are happy and they are happy so they don't want to move.

Utes are very popular in Australia but they are very noisy.

Snakes, snakes are very popular in summer but you always have to look out for them.

Ten, ten, ten numbers are very important things if we didn't have numbers we wouldn't have rockets go up to space.

Rivers, rivers, rivers are very good in summer 'cause if we didn't have rivers we wouldn't be able to stay cool when we go camping.

Aussies are happy in the outback because it is very nice and it has a lot of animals.

Lions, lions, lions most of the lions in the wild get put in zoo's so I hope they can get out very soon.

I love Australia because it is so fun because there are lots of people.

And I love Australia because it has lots of animals and they are so cute.
