

Growing up in Australia

Growing up in Australia is fantastic. We do lots of stuff like camping, fishing, bush walking and sleeping under the stars. These are great things to do and you never get bored.

You can sit down with your family and friends, have a BBQ and a drink to cool you off, but you have got to watch out for the mosquitoes.

In my whole school there are thirty-seven children. My favourite subject is literacy because every day I learn heaps more. The educational activities are awesome such as golf, word bingo, cricket, singing, hockey, dancing, maths competitions and much more.

Australia is the best country on Earth.

My days on the farm are fun because you are away from the noise and you can play a lot of games. You can play on your bike or go on the motor bike with our dad. You can also play with the dogs and cats. You have to try our dad's cooking. It is the best I have ever known.

When the family goes to the river it's fun because we always bring Harley.

I love growing up in Australia.
